

Senior Softwareentwickler/Senior Software Developer (m/f/d)

For our start-up company Service Layers (servicelayers.com), we are now hiring a **Senior Softwareentwickler/Senior Software Developer** (SSDE-1027) in **Stuttgart, Munich or remote**.

About us

Number 1 in Identity and Access Management - that's iC Consult. As the largest vendor-independent system integrator for security solutions (IAM), we have been growing for over 20 years and are now internationally successful, employing more than 500 consultants. However, we not only support our well-known customers in the automotive, logistics, pharmaceutical, and financial sectors with traditional security services, we are also at the forefront of innovative topics such as Customer IAM, Digital Customer Journey, Internet of Things, and API Management.

Job description

In addition to traditional IT consulting for Identity & Access Management, it is increasingly important for our customers to use Cloud services. Using a DevOps approach, we deliver custom solutions that can be deployed much faster than traditional Identity & Access Management projects.

- Do you want to work in an IT security company and significantly help to shape this new service?
- Are you keen to solve mission-critical technical problems with cutting-edge solutions?
- If you're looking for the agility of a startup and the stability of an established business, join us!

Tasks and Responsibilities

- As a part of an **agile DevOps team**, you develop and operate crucial Identity and Access Management solutions for our corporate customers.
- You support the entire lifecycle: from **design and implementation**, to **integration and productive operation** - from **back end** to **front end**.

- You are actively and decisively involved in **architectural and design discussions** about our customer-specific solutions.
- You use state-of-the-art processes like **continuous delivery, configuration as code, zero downtime**, and **cloud technologies** to provide highly scalable, fail-safe solutions.
- You have insight into the latest technologies in **Identity and Access Management, API Management**, and

Skills and Requirements

- You have a degree in **computer science**, business informatics, mathematics, or a related field of study.
- You have at least three years of practical experience and are an expert in Java and the Java ecosystem (Spring) **or in Golang**.
- You feel comfortable using SQL and NoSQL databases.
- You have experience in developing microservices in distributed systems.
- You have broad technical expertise, are interested in **IT security**, and are open to new trends and technologies.
- You have excellent knowledge of written English.

We offer

- Work in an established company with flat hierarchies and short decision-making paths.
- High degree of personal responsibility and a large scope for decision-making.
- Numerous opportunities for personal and professional development and further education.
- Regular team and company events in a relaxed atmosphere.
- Above-average payment, highest quality equipment, and an attractive company car program.
